

# Covid-19 safety measures

---

## NEICS Reconnect Spring meeting

30 March 2022

## Newcastle Civic Centre

We are very pleased to see that so many colleagues have booked a place at the meeting. Thank you for showing your considerate support for each other by being vaccinated, by having done a LFD test before and by wearing a medical face mask during the meeting. We can assure you that the event and the venue is organised to a Covid-19 safe standard.

## Ventilation

We have chosen the Newcastle Civic Centre for its modern well ventilated rooms and have confirmed that the building adheres to building regulation ventilation standards, CO<sub>2</sub> monitors are in place as well.

## Proof of vaccination

Please bring along your covid-19 vaccination passport QR code (printed or on your NHS app > NHS COVID Pass > Domestic, online or as screen shot). We will use a NHS reader to scan the QR code.

## Proof of negative LFD test

Please also bring along a proof of a negative NHS lateral flow device test taken within 12 hours prior to the event. This can be done either by presenting a confirmation text or email via the NHS online Covid-19 reporting system, your actual LFD test or a photograph of your LFD test.

## Face mask

Please bring along your own medical masks for the day. Please wear your medical facemask at all times except when eating or drinking.

## Hand gel

Hand gel is provided by the venue at the building entrance.

We are looking forward to see you at the meeting; it will be good to get together safely as a profession at our NEICS Reconnect Spring meeting 2022.

Kind regards,

North of England Intensive Care Society committee
